This TNSA workshop is in conjunction with the annual Tennessee Environmental Conference on March 15th at the Meadowview Conference Center in Kingsport. If you have already registered for the entire conference or Tuesday only, the workshop is included. The \$50 fee is for the workshop only.

TNSA WORKSHOP **Overview of Tennessee's Draft MS4 Phase II Permit**

Tennessee's NPDES Phase II permit includes a permanent (post-construction) stormwater performance standard, which requires the treatment of a one-inch rainfall using Stormwater Control Measures (SCM's) prior to discharge.

This workshop will provide a overview of the permit requirements and proposed changes. The presentations will provide insight into the primary approaches being implemented in Tennessee and the key policies and procedures needed to adapt them to an individual community.

Finally, we will have a panel available to field questions or concerns from the audience regarding the draft permit.

1:10-1:45 PM: Overview of changes proposed in Tennessee's draft MS4 Phase II Permit reissuance-scheduled for public notice in February, 2016. (Steven Turaski, TDEC)

1-50-2:25 PM: Importance of soil and vegetation to water quality (Mary Halley, AMEC Foster Wheeler)

2:30-3:00 PM: Technical approaches to treat a 1" rainfall (Steven Turaski, TDEC)

3:05-3:45 PM: Panel Discussion (Steven Turaski, Brown Patton, Karina Bynum, TDEC; Mary Halley, AMEC Foster Wheeler)

*To **Register** for This Session please click **Here** under the TN Environmental Conference registration main registration page. You can select the workshop only or register for the entire conference. You will be taken to a secure checkout through **PAYPAL.COM**.*

Registration is \$50 for the workshop only..
